Why Most Leads Never Convert

Small businesses do not lose sales to bad products. They lose them to slow replies and forgotten follow-ups.

Slow replies

A lead messages, nobody answers fast, and they buy elsewhere.

Forgotten follow-ups

Most deals need several touches. Without reminders, they stall.

Scattered chats

Conversations live on personal phones and get lost.

The fix: WhatsApp + CRM together

WhatsApp gets 98% open rates. Tie it to a CRM software for small business, and every lead gets a fast reply and a tracked follow-up. That is how conversion doubles.
